AUTHOR Bekerman, Roslyn, Comp.
TITLE The International Directory of Child Development Research.
INSTITUTION Hofstra Univ., Hempstead, N.Y. New Coll.
PUB DATE [80]
NOTE 116p.

EDRS PRICE MF01/PC05 Plus Postage.
DESCRIPTORS *Child Development; Disabilities; *Health; International Organizations; *Learning Processes; *Personality Development; Play; Private Agencies; Public Agencies; *Research; *Social Behavior

ABSTRACT

This preliminary edition of the International Directory of Child Development Research includes listings for 45 nations. Entries are grouped in the following sections: intranational organizations, international organizations, private institutes, and handicapped children. Names of contact persons, addresses, and institutional affiliations are provided, as well as index terms indicating the focus of research activities at the cited institutions. (Author/RH)

INTRODUCTION

This preliminary edition of the International Directory of Child Development Research has been initiated with the goal of establishing a basis for international understanding in the common pursuit of knowledge concerning child development. It is to serve as a reference and source of communication for those interested in the welfare of children everywhere.

The International Directory of Child Development Research is dedicated to the International Year of the Child/1979 sponsored by the United Nations and the lead agency UNICEF. The Secretariat of the International Year of the Child granted the researcher the use of the IYC logo and facilitated contact with the IYC National Commissions to acquaint them with the project. The Directory was compiled at New College of Hofstra University.

The purpose of this Directory is to facilitate communication among professionals and laymen in the pursuit of knowledge concerning child development. It is hoped that the Directory will be a valuable resource for parents and professionals open to new ideas and to anyone who believes he can profit from understanding systems which exist elsewhere. Finally, this Directory will serve parents, students and professionals seeking information on any of numerous aspects of child development.

As children are the universal hope for the future, we must work together to assure their healthy growth and development of their capabilities to the maximum potential. The Interna-

tional Directory of Child Development Research will, it is hoped, facilitate and foster the exchange of information and cooperation in this vital area of science across national boundaries.

This preliminary edition of the Directory includes listings for forty-five nations. The ultimate goal is to include all countries throughout the world in which the study of the child is being conducted and to up-date our information periodically. UNICEF, although not associated with this project, is facilitating the gathering of information and has recommended that all countries be included in a world-wide edition of such a Directory which Hofstra University might wish to publish in the future under its own responsibility.

All institutions and individuals with relevant information are encouraged to contact the editor at the following address:

Roslyn Bekerman
c/o Dr. Alfred Cohn
New College
Hofstra University
Hempstead, N.Y. 11550
U.S.A

All relevant information will be included in the world-wide edition of the Directory in order to promote cooperation in research and understanding of children's growth and their requirements for healthy development.

ACKNOWLEDGEMENT

We acknowledge with gratitude the dedicated assistance of Mrs. Stella M. Swanson who typed this unusually difficult manuscript and of Mrs. Stella Sinicki, Supervisor, Special Secretarial Services at Hofstra University. We are grateful, too, to Mrs. Lena Hall, Secretary to the Master of Arts Program at New College who performed numerous services essential to the completion of this project.

UNIVERSITY RELATED FACILITIES

Research in child development is a thriving enterprise in the U.S. The major concentration of research talent and facilities in the U.S. are to be found in universities. The U.S. Office of Education has given funds to universities to establish seven laboratories focusing on early childhood education and eight research and development centers which include some studies on the preschool child. Twelve university centers have been established through grants made by the National Institute of Child Health and Human Development to devote research to the causes and treatment of handicaps with the emphasis on mental retardation.
